

# Kanuma® (sebelipase alfa) (Intravenous)

Document Number: MODA-0277

Last Review Date: 02/01/2024

Date of Origin: 05/31/2016

Dates Reviewed: 05/2016, 04/2017, 04/2018, 02/2019, 02/2020, 02/2021, 12/2021, 02/2022, 02/2023, 02/2024

## I. Length of Authorization

Initial coverage will be provided for 6 months and may be renewed annually thereafter.

## II. Dosing Limits

### A. Quantity Limit (max daily dose) [NDC Unit]:

- Kanuma 20 mg/10 mL single-dose vial: 34 vials per 28 day supply

### B. Max Units (per dose and over time) [HCPCS Unit]:

- 340 billable units every 14 days

## III. Initial Approval Criteria <sup>1</sup>

Site of care specialty infusion program requirements are met (refer to [Moda Site of Care Policy](#)).

Coverage is provided in the following conditions:

- Patient is at least 1 month of age; **AND**
- Documented baseline values for one or more of the following have been obtained:
  - Weight-for-age z-scores for patients exhibiting growth failure
  - Low-density lipoprotein cholesterol (LDL-c)
  - High-density lipoprotein cholesterol (HDL-c)
  - Non-HDL-c
  - Triglycerides
  - Aspartate aminotransferase (AST) and/or alanine aminotransferase (ALT)

### Lysosomal Acid Lipase (LAL) Deficiency † Φ <sup>1,6-8</sup>

- Diagnosis has been confirmed by either biallelic pathogenic variants in *LIPA* or deficient LAL enzyme activity in peripheral blood leukocytes, fibroblasts, or dried blood spots

† FDA Approved Indication(s); ‡ Compendia Recommended Indication(s); Φ Orphan Drug

#### IV. Renewal Criteria <sup>1,6,7</sup>

Coverage can be renewed based upon the following criteria:

- Patient continues to meet indication-specific relevant criteria such as concomitant therapy requirements (not including prerequisite therapy), performance status, etc. identified in section III; **AND**
- Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: hypersensitivity reactions including anaphylaxis, etc.; **AND**
  - Treatment has resulted in clinical benefit as evidenced in one or more of the following:
    - Improvement in weight-for-age z-scores for patients exhibiting growth failure
    - Improvement in LDL-c
    - Improvement in HDL-c
    - Improvement in non-HDL-c
    - Improvement in triglycerides
    - Improvement of AST and/or ALT; **OR**
  - Dose escalation\*\* in pediatric and adult patients with a suboptimal clinical response to the 1 mg/kg dose defined by at least one of the following:
    - Poor growth
    - Deteriorating biochemical markers (e.g., ALT, AST), and/or parameters of lipid metabolism (e.g., LDL-c, triglycerides); **OR**
  - Dose escalation\*\* for infants with rapidly progressive disease presenting within the first 6 months of life who have a suboptimal clinical response to the 1 mg/kg dose or 3 mg/kg dose defined by at least one of the following:
    - Poor growth
    - Deteriorating biochemical markers (e.g., ALT, AST)
    - Persistent or worsening organomegaly

#### V. Dosage/Administration <sup>1</sup>

Indication	Dose
LAL Deficiency	<p><u>Pediatric &amp; Adult patients:</u></p> <ul style="list-style-type: none"> <li>• 1 mg/kg administered once every other week as an intravenous infusion</li> <li>• May increase dose to 3 mg/kg once every other week for patients who do not achieve an optimal clinical response to the 1 mg/kg dose**</li> </ul> <p><u>Infants with rapidly progressive disease presenting within the first 6 months of life:</u></p> <ul style="list-style-type: none"> <li>• 1 mg/kg administered once weekly as an intravenous infusion</li> <li>• May increase dose to 3 mg/kg once weekly for patients who do not achieve an optimal clinical response**</li> </ul>

	<ul style="list-style-type: none"> <li>• May further increase dose to 5 mg/kg once weekly for patients who do not achieve an optimal clinical response to the 3 mg/kg dose**</li> </ul> <p>**Refer to dose escalation criteria in section IV</p>
--	--

## VI. Billing Code/Availability Information

### HCPCS Code:

- J2840 – Injection, sebelipase alfa, 1 mg; 1 billable unit = 1 mg

### NDC:

- Kanuma 20 mg/10 mL single-dose vial: 25682-0007-xx

## Appendix 1 – Covered Diagnosis Codes

ICD-10	ICD-10 Description
E75.5	Other lipid storage disorders

## Appendix 2 – Centers for Medicare and Medicaid Services (CMS)

The preceding information is intended for non-Medicare coverage determinations. Medicare coverage for outpatient (Part B) drugs is outlined in the Medicare Benefit Policy Manual (Pub. 100-2), Chapter 15, §50 Drugs and Biologicals. In addition, National Coverage Determinations (NCDs) and/or Local Coverage Determinations (LCDs) may exist and compliance with these policies is required where applicable. Local Coverage Articles (LCAs) may also exist for claims payment purposes or to clarify benefit eligibility under Part B for drugs which may be self-administered. The following link may be used to search for NCD, LCD, or LCA documents: <https://www.cms.gov/medicare-coverage-database/search.aspx>. Additional indications, including any preceding information, may be applied at the discretion of the health plan.

Medicare Part B Covered Diagnosis Codes (applicable to existing NCD/LCD/LCA): N/A

Medicare Part B Administrative Contractor (MAC) Jurisdictions		
Jurisdiction	Applicable State/US Territory	Contractor
E (1)	CA, HI, NV, AS, GU, CNMI	Noridian Healthcare Solutions, LLC
F (2 & 3)	AK, WA, OR, ID, ND, SD, MT, WY, UT, AZ	Noridian Healthcare Solutions, LLC
5	KS, NE, IA, MO	Wisconsin Physicians Service Insurance Corp (WPS)
6	MN, WI, IL	National Government Services, Inc. (NGS)
H (4 & 7)	LA, AR, MS, TX, OK, CO, NM	Novitas Solutions, Inc.
8	MI, IN	Wisconsin Physicians Service Insurance Corp (WPS)
N (9)	FL, PR, VI	First Coast Service Options, Inc.
J (10)	TN, GA, AL	Palmetto GBA, LLC
M (11)	NC, SC, WV, VA (excluding below)	Palmetto GBA, LLC
L (12)	DE, MD, PA, NJ, DC (includes Arlington & Fairfax counties and the city of Alexandria in VA)	Novitas Solutions, Inc.
K (13 & 14)	NY, CT, MA, RI, VT, ME, NH	National Government Services, Inc. (NGS)
15	KY, OH	CGS Administrators, LLC
